### **SCOTT H. KOZIN, MD**

Scott Kozin graduated from Duke University in 1982 with a degree in computer science. Medical School was completed at Hahnemann University in Philadelphia, followed by orthopaedic residency at Albert Einstein Medical Center. Fellowship was completed in 1992 at the Mayo Clinic focusing on hand and microvascular surgery. Dr. Kozin initially cared for adults and children until the year 2000, when he devoted his practice and research to children at Shriners Hospitals for Children in Philadelphia. Since that time, Dr. Kozin has been an advocate for improving the lives of children via research, education, and patient care. He is currently Chief of Staff at Shriners Hospitals for Children in Philadelphia. He has published over 100 peer review papers, mainly on the care of children with various diagnoses including brachial plexus injury, spinal cord injury, and congenital differences. He routinely travels to developing countries to operate on child in need. Dr. Kozin received the Weiland Metal by the American Society for Surgery of the Hand in 2010, which honors a hand surgeon/scientist who has contributed a body of research that advances the field.

Dr. Kozin was president of the American Society for Surgery of the Hand 2014. He implemented the Touching Hands Project to foster hand care around the globe with a focus on developing and underserved countries. The mission statement reads "Creating opportunities for hand specialists to give back their knowledge and expertise to the global community." The augural mission to Haiti occurred in 2014 and has increased to 10 annual missions around the globe. Dr. Kozin was a key member in the first pediatric hand transplant in 2015. The successful procedure transplanted bilateral arms to Zion Harvey and has been inspiration for children with missing limbs.

Dr. Kozin is also a devoted husband and father to his two children, Bryan and Samantha. During his leisure time, he enjoys travel, food, and mountain biking.
